HOTTETERRE
⚓

Hotteterre

Paris, ca. 1700

Based on the original in the Landesmuseum
Joanneum, Graz (Austria)

This three-joint instrument is at this moment
recognized as the only authentic flute with the
stamp of the Hotteterre workshop.

Made in ebony (like the original) or grenadilla
with imitation ivory cap, boss and partial ivory
foot and silver key.

(pitch: a-392 Hz)

RIPPERT

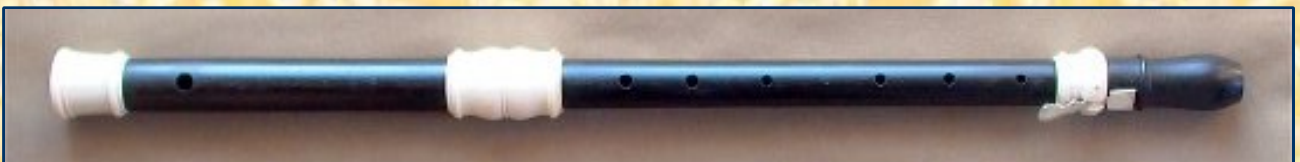

Rippert

Paris, ca. 1700

Based on the instrument from the Glen
Collection in Glasgow.

Made in boxwood (like the original) or ebony
with imitation ivory fittings and silver key.

(pitch: a-392 Hz)

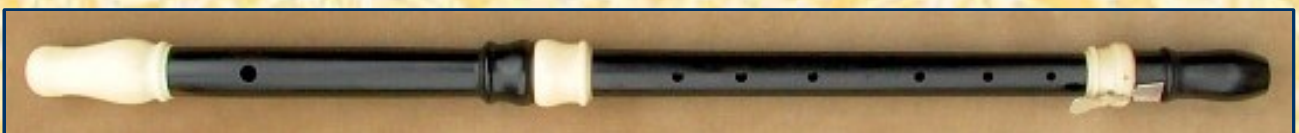

Pierre Naust

Paris, ca. 1692-1734

Based on the instrument from the
Musikinstrumenten-Museum, Berlin

Made in boxwood without ivory fittings (like the
original) or ebony with imitation ivory fittings and
silver key in original pitch: c. a-400 Hz or with
middle joint at a-392

Naust

Workshop, ca. 1734

From the collection of Peter Spohr (Frankfurt).

This instrument is one of the earliest known four-joint flutes.

Made in boxwood (like the original) or ebony with imitation ivory fittings and silver key in original pitch: a-398 Hz and extra middle joint at 392 Hz.

Johann Joachim Quantz

1697-1773

Based on the instrument from the Musikinstrumenten-Museum, Berlin.

Made in ebony (like the original) with ivory mounts, headjoint tuning slide and two silver keys (pitch: a-392Hz) and a second headjoint with a smaller embouchure.

Available with following extra middle joints: a-398Hz, a-404 Hz, a-410 Hz and a-415 Hz.

Though Quantz was not keen to deliver his flutes (including several middle joints) with a foot-register, it remains a helpful tool to play in tune on the same instrument using different middle joints. Available with either the 'original' foot joint or with foot-register.

POI
BRESSAN

Peter Bressan

Bourg-en-Bresse 1663,
Tournai 1731,
London ca. 1688-1730

Four-joint flute from the collection of the
Victoria & Albert Museum in London.

Ebony with wide silver rings and key playing at
a-407 Hz.

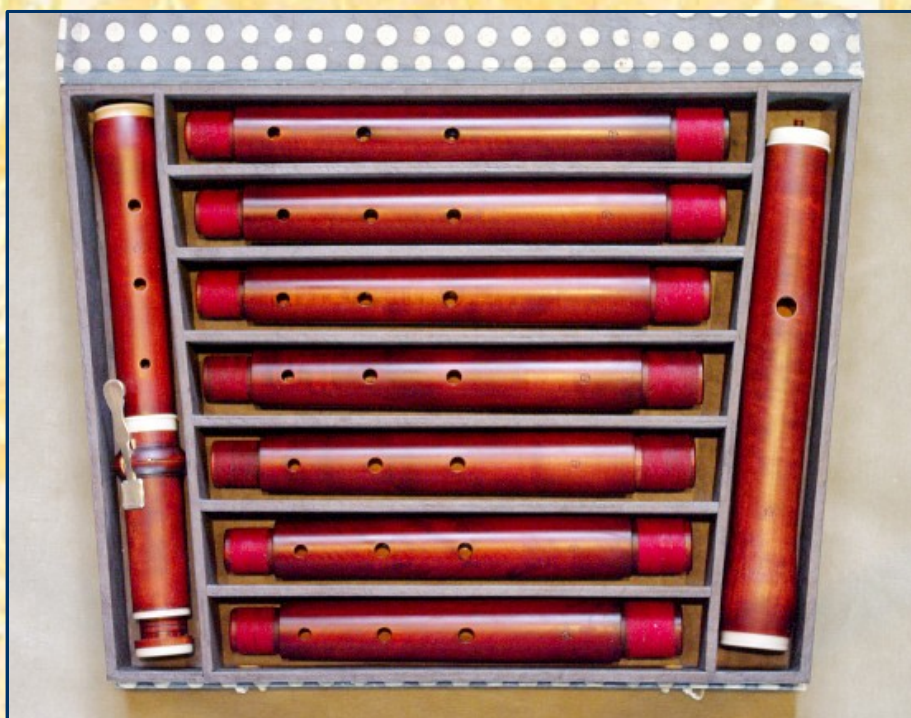

G. A.
ROTTENBURGH
✱

Godefroid-Adrien Rottenburgh

Brussels, 1703-1768

Based on the four-joint flute (ca. 1760) in the collection of Barthold Kuijken, this instrument is available as a complete set with its seven middle joints, screw cap and foot register, or with only one middle joint playing at a-415 Hz.

Made from boxwood, with imitation ivory rings and silver key.

Johann August Crone

Leipzig, 1727-1804

Based on the instrument from the
Musikinstrumenten-Museum, Berlin.

Made in boxwood (like the original) or ebony
with imitation ivory fittings and silver key.

(pitch: a-415 Hz)

CARLO
PALANCA

Carlo Palanca

Turin, ca. 1690-1783

Based on an instrument from a private collection
in Germany.

Made in ebony (like the original), grenadilla or
boxwood with imitation ivory fittings and one
silver key playing at a-415 Hz.

(extra: middle joint playing at a-430 Hz)

Extra headjoint with a more round embouchure
of another instrument by the same maker.

Carl Augustin I Grenser

Dresden, 1720-1807

Based on different instruments from private collections in Germany and France.

Made in ebony (like the original) with imitation ivory rings and one silver key playing at a-415 Hz.

Extra: screw cap & foot register and middle joint playing at a-430 Hz.

STANESBY
JUNIOR

Thomas Stanesby Jr.

London, 1692-1754

Based on the instrument formerly in the collection of Mme. de Chambure in Paris, now in the 'Musée de la Musique', Paris.

Made from English boxwood.

(pitch: a-410 Hz)
